

Luigi Bormioli

The current worldwide success of Italian style is the result of the creativity, good taste and inventiveness so typical of Italians, coupled with their exceptional skills and know-how. These qualities are the cornerstones on which Luigi Bormioli has built its success in the glass industry worldwide, and are brought into life with products having aesthetic and quality value as well as the capacity to deliver innovation.

Luigi Bormioli stemware and tumblers are made of Blown Lead Free Crystal Glass. These are products characterized

by a high standard of quality achieved through advanced technology resulting in the production of a very transparent and resistant glass. Abrasion from daily usage causes fragility. Titanium reinforced stems hardens the glass surface reducing abrasion and increases resistance to breakage.

A revolutionary new treatment that reduces surface friction on Carafe's and Decanter ensures perfect pouring into the glass, eliminating stains and drips on the tablecloth.

Ranges available in the latest technology include Gourmet, Vinoteque, Elegante and Puro. These new products compliment classics like Michelangelo Masterpiece, which continues to be an everlasting bestseller! Luigi Bormioli Fine Crystal Glass is elegant, robust, glassware for everyday, fine dining and wine enthusiasts. Western House is renowned in the industry for their expertise in glassware and are the UK exclusive distributor for Luigi Bormioli.

Italesse

A fresh and foamy beer as well as a fine cocktail or a refreshing soft drink constitute the different uses for which Brew Beach has been conceived, the newborn stemmed glass that widens the range of products offered by Italesse's beach line. Thought for the liveliest parties on crowded clubs or for extreme relax situations like an afternoon on the swimming pool or on a yacht, these products are made of polycarbonate, unbreakable and dishwasher safe. Brew Beach is available on 33 and 44 cl sizes and on clear and black colours.

Glass Brasil

Glass Brasil was born from a joint initiative by Sindividro - Union of Flat and Hollow Glass and Crystal Producers from the State of São Paulo and the Brazilian Trade and Investment Promotion Agency - an organ from the Ministry of Development, Industry and Foreign Trading of Brazil which main goal is to stimulate the Brazilian exports. Bringing together 9 Brazilian glass industries which masters the many ways of glass production, from the manual production (blown glass) to the most sophisticated automatic process, offering a great range of products and reaching the global market.

The project enables the companies to participate of international events like fairs and exhibitions and stimulate the visit of international importers, opening new markets and allowing the members to have more notability in the international market.

The website (www.glassbrasil.com) presents part of the company's work and is a reference for those interested in purchasing Brazilian glassware products. Products are divided into the following sectors: Beverageware, Serveware, Ovenware, Decorative Accessories and Storage ware. With the support of Glass Brasil program, the associated industries have been in the following international events: Ambinete Frankfurt, the Hong Kong Houseware Fair, macef, and the International Chicago Houseware Show.
